

# Future Perspectives WG1

- ◆ After Review:
  - Focus on Production Grid
  - Finish Deliverable 1.4

# Production Grid

- ◆ Components
  - Softenvironment
    - Define components:
      - often used libs, compilers
      - implement mpi, mpichG2 components
      - information into stellaris
  - Reliable Services for
    - JobHandling
      - JSDL-templates for UseCases
      - simple workflows of atomic jobs
    - Monitoring
      - put queue status and other info into Stellaris
      - move to new GLUECE schema
    - File and DataBase-Access handling
      - first tests on file service implementation
      - include OGSA Dai

# Production Grid

- ◆ VO Management
  - ▣ stabilize procedures
    - integrate D-Grid procedures
    - improve volist
- ◆ Software procedures
  - ▣ start with continuous integration for components
  - ▣ get GT development into our plans, prepare for handling new release
- ◆ D-Grid resources
  - ▣ Define and implement policies
  - ▣ Focus on Storage
